RESEARCH SUPPORT SERVICES:

The Research team at Island Health provides a wide range of support services to Island Health staff and the local research community to enable a variety of research initiatives. Our services include research ethics, operational review, data management and biostatistics, participant recruitment, contracts, grant facilitation, and research facilitation. Role descriptions and contact details are available in this [factsheet](#). For more information, please email research@viha.ca. We look forward to working with you!

SkillStat:

SkillStat has offered emergency medicine courses to Vancouver Island for more than 10 years, with repeat visits to most every community up and down the coast.

ACLS PALS Provider and Renewal courses in Nanaimo and Victoria with BLS included in every course:

<https://www.skillstat.com/our-classes/courses-vancouver-island>

SkillStat offers private ACLS, BLS, PALS, ECG and Procedural Sedation courses throughout Vancouver Island from Port Hardy to Victoria and all sites in between for group sizes of 6 people or

UPCOMING EVENTS – 2018

UBC Emergency Medicine Research Day

[Wednesday, April 10, 2019 9am to 4pm](#)

We are pleased to invite you to attend the 11th Annual UBC EM Research Day. The event will take place at the CRFI Chan Centre auditorium at BC Children's Hospital in Vancouver and will be live broadcast online.

REGISTRATION: [Click here to register.](#)

If you plan to attend, as an audience member or presenter, please complete the online registration form

The event will run all day and include a complimentary lunch and food/beverage breaks.

UBC/SPH/VGH/BCWH/BCCH Videoconference ROUNDS

Room confirmations will be sent out weekly/monthly with notice

CICSL and the Royal College are proud to announce the SET and PASS course will be coming to Victoria in 2019

Upcoming Events

Are you looking to become a better simulation educator? The Royal College can SET you on your way with its Simulator Educator Training course, January 30th, 31st, and February 1st, hosted at CICSL.

In addition to the SET course, don't miss out on the Principles of Assessment in Simulation Supplement Course (PASS) on February 2nd. This one day workshop aims to support effective practice and integration of simulation based assessments into competency-based education. Visit www.royalcollege.ca/ppi to sign up!

Centre for Interprofessional Clinical Simulation Learning

FACULTY OF MEDICINE

University of Victoria

Course format

Three-day workshop

The course is divided into six modules, plus there is an online four-to-five-hour pre-course component covering a variety of introductory material. Each day will feature instruction as well as small group activities where learners apply concepts in an interactive environment.

During the first half of the workshop, participants are introduced to the principles or concepts that apply broadly to the other modules in a one-hour introductory module and learn about best practices in simulation-based learning in another one-hour module. A three-hour module on the Principles of Curriculum Development and the Role of Simulation provides the learner with a basic understanding of curriculum development along with the tools to facilitate integration of simulation into existing curriculum or to plan a new curriculum that includes

www.royalcollege.ca/ppi

simulation. Participants then learn how to assess performance and are introduced to key concepts to consider when evaluating simulations in a four-hour module called Principles of Performance Assessment.

The last two modules offer an opportunity to practise incorporating simulation into their curriculum. In a five-hour module on Design and Development of Simulation Scenarios, participants learn how to create a simulation case and test it. In the seven-hour Facilitation, Feedback and Debriefing module, participants learn how to facilitate a simulation session and provide effective feedback to learners.

Expect the highest standards

October 2012

Simulation Educator Training (SET)

Practice, Performance and Innovation Unit

Learning for life

The Royal College's Simulation Educator Training Course

The Royal College Simulation Educator Training course was developed to improve medical training capacity in Canada through faculty development and will serve as the foundation for growth of simulation-based health educator competency across Canada.

Introduction

Research has validated simulation as an effective learning tool, and more educators in the health professions are incorporating simulation in their curricula. This course provides instruction to health educators who would like to integrate technology into their programs but who are unsure of how to get started.

What you'll learn

The principal aim of this course is to enable health educators to effectively implement and facilitate a variety of simulation-based learning opportunities for their students.

The focus of this program is on the advancement of competencies required to:

- Develop a simulation curriculum and integrate it with other learning activities;
- Design and develop simulation cases;
- Facilitate simulations;
- Provide effective feedback and debriefing;
- Evaluate simulations.

Practice
Performance
Innovation

Audience

Custom designed for health care professionals who are currently or planning to be engaged in simulation-based education.

As part of our commitment to continuous quality management, all participants are required to submit confidential evaluation forms upon completion of the course. This evaluation will help measure the course's educational impact on educators and learners.
