

Re: Updates to PED Eating Disorder Admission order set

Date: January 9 2025

To: Order Set users including Providers, Nurses, Pharmacists, Allied Health & NUAs

From: Medication Safety & Child, Youth and Family

Background: The PED Eating Disorders Admission order set has been updated to align with the new care plan (which is published) and the new guidelines (under revision).

What do I need to know?

Revisions include (but are not limited to):

- the addition of Involuntary Admission modules
- significant updates to the activity orders
- clarification around One-to-One Meal Support with different choices for who may be present for the support
- a new nursing communication re: intranet and electronic devices
- the removal of ibuprofen
- the removal of electrolytes. Use **Electrolyte Replacement Pediatric (module)** when needed.

** Please read the order set carefully as all revisions are not listed below.*

- The revised order set is now available:
 - **For non-CPOE activated sites:** Via the [Island Health Order Sets library](#) (in the [Pediatrics, PICU and NICU folder](#)).
 - **For CPOE-activated sites (e.g. RJH, VGH, NRGH):** Available in Cerner PowerChart.

What do I need to do?

- Please remove outdated paper versions of this order set from your unit.
- Consider printing the new order set in small batches, from the OS Library or Print Services.
- Please share this notification with relevant colleagues and staff at your site.
- For general order set enquiries contact the Med Safety Order Set Team at orderset@islandhealth.ca.
