

## CHANGE: PharmaNet Viewer Access

Island Health is aligning with a new Cerner BC Provincial Model for access to PharmaNet information. This will change how you currently access PharmaNet information through the PharmaNet Viewer.

### What this means for you

The previous way to access the PharmaNet Viewer will be retired.

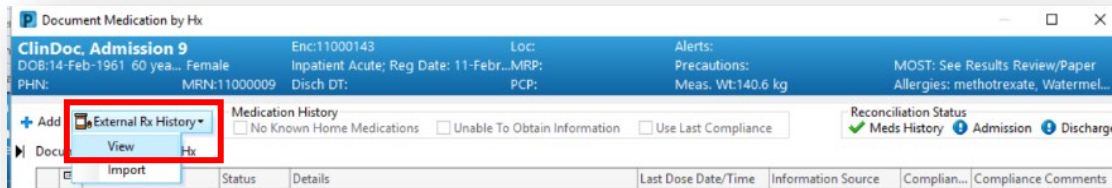

You will still have access to PharmaNet information, using one of two workflows.

#### Workflow One:

1. If you are working within Provider View start within that view.
2. Select Home Medications component
3. Click on Meds History
  - a. Document Medication by Hx window opens

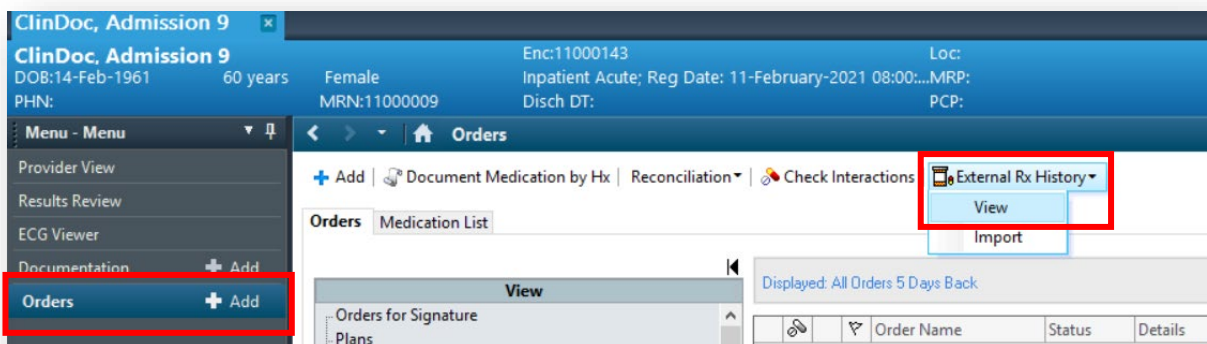

4. Click External Rx History
5. Select View

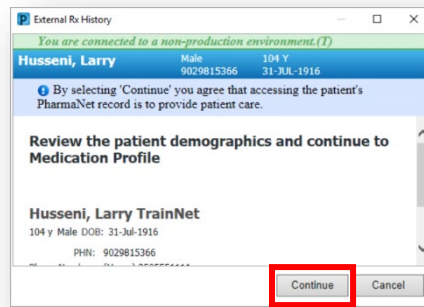

#### Workflow Two:

1. If you are still using the Legacy Menu start within this menu.
2. Select Orders
3. Click on External Rx History
4. Select View

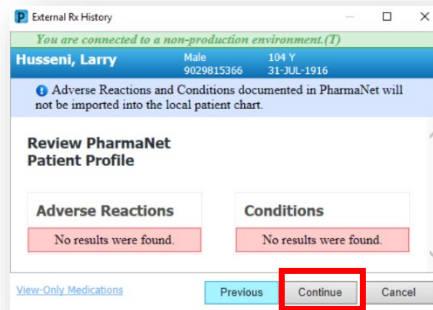

## Once the PharmaNet View is selected

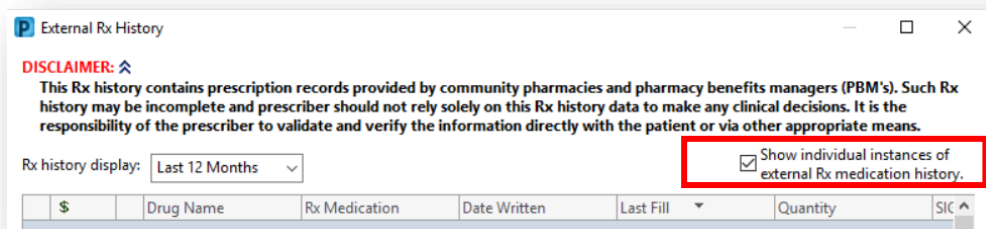

1. Click Continue, by selecting “continue” you agree that accessing the patient’s PharmaNet record is to provide patient care

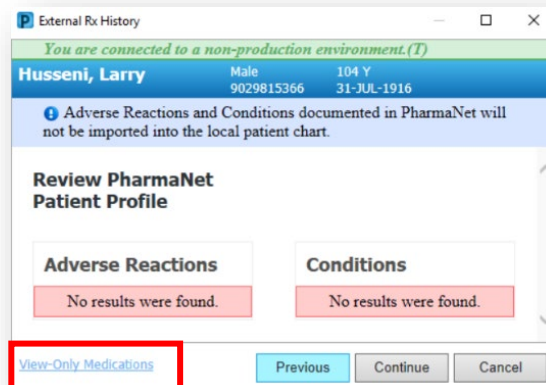

2. The first time accessing this view click Continue

3. Check **Show individual instances of external Rx medication history.** Once this box has been checked, it will remain as the default.

**View-Only Medications** may be used to see the list of medications similar to what was previously displayed through the PharmaNet Viewer, see next page for display samples.

Selecting **View-Only Medications** will display medications in the format shown below.

**External Rx History**

*You are connected to a non-production environment.(T)*

**Hutchinson, Collette** Female 86 Y  
9029815603 06-JUN-1934

This Rx history may be incomplete and the prescriber should not rely solely on this Rx history data to make any clinical decisions. It is the responsibility of the prescriber to validate and verify the information directly with the patient or via other appropriate means.

**Review PharmaNet Medications (14 Months)**
