1.0 Mainpro+/MOC Section 1

Details/Registration: [COVID-19 in Pregnancy](#)

Cost: FREE

GROUP LEARNING OPPORTUNITIES (ONGOING OPPORTUNITIES) DELIVERED RURALLY

The following group learning activities allow facilitators to provide education to small groups “in-house.” **Funding for rural communities for “in-house” education is available through the RCME Community Program. Please contact Antoinette Picone antoinette.picone@islandhealth.ca for more information.**

Coaching and Mentoring Program (CAMP)

UBC Rural CPD's Coaching and Mentoring Program (CAMP) fosters peer connections in rural practitioner networks to improve your practice, increase your confidence, and connect you to rural colleagues. Peer support can take many forms, from an occasional phone call with a coach/mentor to a site visit to shadow a specialist as they perform procedures you don't often see in your community. CAMP connects you with personalized, just-in-time support in whatever form works best for you. Coach/mentors provide support in a wide variety of areas including transitions in practice, emergency medicine, palliative care, Indigenous patient care, personal wellness and more.

35 Mainpro+/MOC Section 1 credits for coachees/mentees

Details/Registration Link: [CAMP](#)

Cost: FREE

Enhanced Simulation of Critical Care and Perioperative Emergencies (ESCAPE) Course

This one-day, high-fidelity simulation course helps your team optimize crisis resource management in the rural perioperative setting. This course was designed by rural physicians for rural physicians, we understand the challenges of providing surgical care in a low-volume resource setting and want to support you. The scenarios are customized to your community's needs and the entire multidisciplinary team is encouraged to participate including family physicians anesthesiologists, emergency physicians, enhanced surgical skill physicians, and nurses.

12.0 Mainpro+/MOC Section 3

Details/Registration Link: [ESCAPE course](#)

Cost: Contact for a quote

FAST Evidence

FAST Evidence begins with a half-day, interactive course that teaches physicians how to conduct effective internet searches in order to find credible and evidence-based medical information from a variety of databases and online sources. Designed for a small group of up to 12 learners, the course is facilitated by two College of Physicians and Surgeons of BC Librarians who provide learners with hands-on support in a computer lab setting. To support ongoing learning and application, this program also involves post-program activities, including reflection and coaching sessions following the live workshop.

16.5 Mainpro+ / 5.5 MOC Section 3

Details/Registration Link: [FAST Evidence](#)

Cost: \$399 +GST

Hands-On Ultrasound Education Acute Care (HOUSE-EM)

The Hands-On Ultrasound Education Program delivers innovative content and on-site learning. Customize

the course to the needs of your community by selecting from a menu of ultrasound topics. You will learn how to use point-of-care ultrasound (POCUS); skills to enhance your practice and applications to expedite diagnosis and treatment of urgent or life-threatening conditions.

Up to 63.0 Mainpro+ (3 cr/hr), 21.0 MOC Section 1

Details/Registration Link: [HOUSE-EM Course](#)

Cost: \$1,950 + GST per person, per day

Hands-On Ultrasound Education Acute Care (HOUSE-OB)

The Hands-On Ultrasound Education Course (HOUSE-OB) supports rural health care practitioners who provide obstetrical care to patients. You will improve your management of patients in the third trimester through hands-on learning sessions with rural physicians who are experienced in point-of-care ultrasound. You will learn to improve your management of patients and answer these specific questions:

Is the fetal presentation head down?

Is fetal cardiac activity present?

Is the placenta a safe distance from the cervix?

Is there a normal amount of amniotic fluid?

Is there more than one fetus?

27.0 Mainpro+ (3cr/hr) / 9.0 MOC Section 1

Details/Registration Link: [HOUSE-OB Course](#)

Cost: \$1,950 + GST per person, per day

Optimizing Communication for Excellence

Effective communication between physicians, patients, colleagues and staff has been proven to enhance our health care system, improve outcomes and lead to better patient and health care practitioner satisfaction. The Optimizing Communication for Excellence course begins with a one-day workshop, in which participants learn a simple 4-stage framework to navigate difficult conversations. After the workshop, you'll benefit from a 30-minute personalized coaching call included as part of the course. To support your ongoing learning and practice, you'll have opportunities to share with peers and program facilitators your insights, successes and challenges in a safe and positive environment. Beyond general communication skills, this workshop will teach you new approaches to speaking with patients and colleagues, while learning specifically how to navigate difficult conversations.

28.5 Mainpro+/9.5 MOC Section 3

Details/Registration Link: [Optimizing Communication for Excellence](#)

Cost: \$675+ GST

Real-Time Virtual Support Education (RTVS)

Real-Time Virtual Supports (RTVS) provide on-demand consultation to support patient care and rural healthcare collaboration. We are excited to partner with the RTVS program to offer CME certificates and a multi-modal simulation program.

CURRENT RTVS SUPPORTS

Instant Access Pathways (24/7)

RUDi (emergency)

CHARLiE (pediatrics)
