

Well Planned Action Series

Many factors influence the ability of all team members (including patient/family) to be aware of a patient's medical goals for discharge. The Well Planned Action Series will support teams to explore which factors affect them and help identify high impact-low effort ideas for improvement they want to test in their area.

Medical Goals for Discharge provide information about the clinical reason for a patient's admission and describe the clinical status the team is working towards in order to be medically fit for discharge. Medical goals for discharge is not a checklist to be achieved before discharge (criteria led discharge), or a component of advanced care planning (goals of care).

An Action Series is a learning opportunity for small groups of multidisciplinary team members. It consists of five theme-based video modules and activity guides that can be completed asynchronously or together.

Up to 6 hours over 5 months

Can be done in 5-10 minute segments

Videos ~10-20 minutes per month

Activities ~ 45 minutes per month

Funding at the JCC sessional rate for participating physicians

Eligibility Criteria:

- Clinically Active Hospital-Based Medical Staff (Physician/NP), Nurses (RN/LPN), and Allied Health (SW/PT/OT/SLP, Liaison, etc.); Patient Partners welcomed
- Multidisciplinary teams of 3-7 people involved in Creating, Communicating, or Clarifying Medical Goals for Discharge. *Must include at least one physician and one non-physician role*

Each area has unique challenges and the best people to identify opportunities for improvement are the people involved in doing the work. This local Action Series was created to support teams to make grassroots level changes that make sense for their context.

Ask a few colleagues/friends to join you and sign up today! There is no Team Lead role and no additional responsibilities for pulling together a group interested in testing some ideas for improvement.
